w241 Section 5 - Apr 20, 2023

● ● Is There Gender Bias in Food Services Hiring?

Research Question

● Is gender implicit bias present in the food service industry's hiring practices?

73%

Male Line Cooks

26.9% of line cooks are women and 73.1% of line cooks are men

61%

Male Restaurant workers

38.7% of all restaurant workers are women, while 61.3% are men

32%

Male Servers

68% of all servers are women, while 32% are men

Primary Hypothesis

We anticipate that despite the shifting cultural landscape promoting diversity, that gender implicit bias persists, leading to men receiving more requests to interview for back-of-house positions, while women will be favored for front-of-house positions.

Secondary Hypothesis

Though there is not a lot of data on non-binary people in the restaurant industry, we expect non-binary individuals to be contacted less than both male and female applicants.

Hi Cypress,

Thank you for reaching out. We would like to go ahead with an interview but first could you clarify the extent of your
experience at the Slanted Door? They claim to have no record of your employment at the San Ramon location.

Flow diagram of the experiment

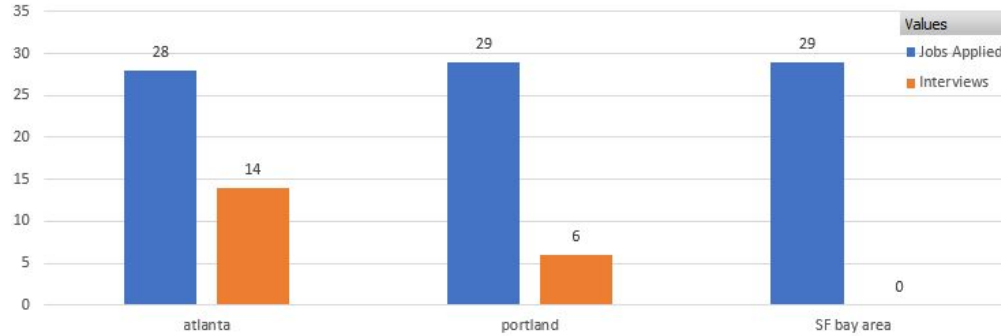

Data

	Jobs Applied	Interviews	Response Rate
Control (Charles, Male)	221	67	30.32%
Treatment 1 (Claire, Female)	213	65	30.52%
Treatment 2 (Cypress, Non-Binary)	204	52	25.49%
Grand Total	638	184	28.84%

	Jobs Applied	Interviews	Response Rate
Cook	320	105	32.81%
Server	318	79	24.84%
Grand Total	638	184	28.84%

Data

Pilot Data

Full-Scale Experiment Data

Analysis

- **Outcome:** Interview requested (binary)
- **Treatment variable:** Factor with levels man, woman, non-binary
- **Covariates:**
 - Job category (Line Cook, Server, Host/Hostess, Cashier, Manager..)
 - Job type (Front of House, Back of House)
 - Hours (part-time, full-time, employee's choice)
 - Location (Bay Area, NY, Atlanta..)

Results

Dependent variable:			
	interview_requested_binary		
	(1)	(2)	(3)
factor(treatment)Nonbinary	-0.048 (0.044)	-0.051 (0.044)	-0.060 (0.045)
factor(treatment)Woman	0.002 (0.044)	-0.005 (0.044)	-0.011 (0.044)
factor(foh_boh)BOH		0.346 (0.454)	0.061 (0.500)
factor(foh_boh)FOH		0.268 (0.454)	-0.005 (0.510)
Constant	0.303*** (0.031)	-0.000 (0.452)	0.662 (0.595)
Fixed effects	No	No	Yes
Observations	638	638	638
R2	0.003	0.011	0.118
Adjusted R2	-0.001	0.004	0.039
Residual Std. Error	0.454 (df = 635)	0.452 (df = 633)	0.444 (df = 585)
F Statistic	0.819 (df = 2; 635)	1.699 (df = 4; 633)	1.502** (df = 52; 585)
Note:			
*p<0.1; **p<0.05; ***p<0.01			

Limitations of the experiment

- Our outcome does not generalize to rural areas
- Our experiment focused only on part of the hiring process – there could still be gender bias in the interviewing stage
- Does our study generalize outside of Craigslist? Are employers who post ads on Craigslist different than those restaurants in the city that just put up help wanted signs, for instance?
- It is possible that an employer requested an interview after our data analysis
